**Subject:** Break Up Microsoft

Dear Justice Dept:

Your charge is important and underestimated by most Americans. After national defense, antitrust enforcement is the number two charge in our free market system.

The incentive in our free market system is to become a monopolist. Microsoft long ago achieved that status and more than their deserved economic reward for their success. They need to be broken up.

To date, the Justice Dept. has utterly failed to protect our economy from this significant monopolist. Please consult knowledgeable economists on this matter and rectify your grievous error in antitrust enforcement.

Thank you for recognizing your errors and correcting them.
